ABOUT ME

I am a passionate and creative frontend developer with four years of experience in building user-friendly and responsive web applications using React.js. I have a solid understanding of web development fundamentals. I also have some exposure to backend development using Node.js and Express, which enables me to collaborate effectively with backend developers and integrate frontend and backend functionalities. I am always eager to learn new skills and technologies, and currently I am exploring Python and machine learning concepts to enhance my professional growth and expand my horizons.

EXPERIENCES

Mid-Level FrontEnd Developer
