ABOUT ME

*Imagine a world without computers and programmers !
— it's hard to fathom, right?*

As a passionate and creative **frontend developer** with four years of experience, I thrive on bringing user-friendly and responsive web applications to life using **React.js**.

My solid understanding of **web development fundamentals**, coupled with my exposure to **backend development**, enables me to collaborate effectively with my teammates.

So If you're looking for a motivated person, that's **me**.

I'm always eager to learn new skills and technologies. Currently, I'm diving into **Python** and **machine learning** concepts to enhance my professional growth.

WORK EXPERIENCE

May 2021 - PRESENT

Kahkeshan Group of Companies Iran, Tehran

Front-end Developer

- Making over 10 web applications based on business and consumer use.
- Collaborating with talented people.

- **Realtime techs:** Socket.io, SignalR

EDUCATION

2021 - 2023

PAYAME NOOR UNIVERSITY

- Master of Software Engineering

2017 - 2020

BORUJERD UNIVERSITY

- Bachelor of Computer Engineering

MY NEW PATH AND GOALS

Career Objective:

As a dedicated machine learning enthusiast, I am committed to advancing my expertise in artificial intelligence (AI) to contribute to innovative solutions that address real-world challenges.

With a solid foundation in Python, I aim to leverage my skills to develop intelligent systems that enhance decision-making and improve lives.

At the present I'm Learning Machine learning concepts, like:

- **Libraries:** numpy, pandas, matplotlib
- **Tools:** Jupyter notebook
- **Classical ML concepts:**
 - Regression
 - Classification
 - Clustering
- **Deep Learning and neural networks:**
 - MLP

Why I've chosen AI?

In my point of view, Artificial intelligence is transforming the world, with its applications spanning various sectors such as healthcare, finance, transportation, and smart cities.

By embracing AI, I aim to be part of this global transformation, contributing to advancements that can lead to a more efficient and equitable future.

What I'm working on?

For now, I'm working on simple and basic projects such as: breast-cancer classification, House Price Prediction, Mall Customer Segmentation,

CERTIFICATES

2022
