Amirhossein Goodarzi

Full-stack Developer

ME, MYSELF & I

Full Stack developer, seeking to learn and progress in all work and personal fields , ...

I'm interested in user interface effects, animations and creating visual and dynamic web applications by Front-End.

also an organized person, a problem solver, an independent employee with great attention to detail for Back-End development.

In my opinion, the most important job aspect, is a friendly and active work environment, without dispute and full of new challenges.
